

Multi Round SS/CS Filter Housings - 15 Round

GPS Metallic Filter Housings are made out from SS304 / SS316 / SS316L / CS / MS material with innovative features like lower pressure drop at higher flow rate, larger connections, air venting provision, robust knife-edge, zero bypass and leak proof sealing. They are sealed with top seated Buna-N/Silicon/Viton* 'O' ring by positive tangential contact that eliminates accidental misplacement.

Vessels have various connection sizes and types to match various flow rating and piping configurations.

All housings have been tested and passed the hydrostatic leak and burst pressure to ensure consistence safe performance.

*Viton is a registered *trademark* of Dupont.
